HAVEL'S SEWING: OUR STORY

Havel's is a multi-divisional medical device company started in 1981. As a company specializing in everything sharp, from surgical blades to spinal needles, it didn't take long for our owner, a long time quilter and sewing enthusiast, to use Havel's connections to develop new innovative scissors and products to help with various projects. Word spread of these never before seen products, and soon after, Havel's Sewing was born.

With a strong research and development team and expertise in the world of sharp, Havel's Sewing was positioned to become a go-to source for sewing and quilting products for consumers, retailers, and eventually distributors. Our unique products have become common in many stores across the country, as we continue to look for new innovative ways to make your lives easier, and your finished project the best it can be.
